- IT Strategy Development
- Proof of Concept Evaluations
- Business Continuity
- Disaster Recovery
- Emerging Technology
- Project Management
- Budget Management
- Change Leadership
- Capacity Planning
- Global Team Leadership

PROFESSIONAL EXPERIENCE

LOGICOM | Auburn Hills, MI

2/2013 – Present

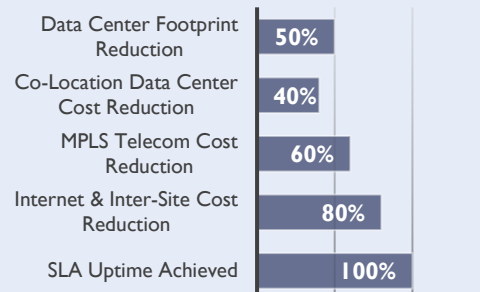

A global supply chain logistics provider with 130 global locations serving high-profile, Fortune 500 clients.

Global Director of IT, Technical Architecture

Manage global IT architecture and design robust, cost-effective infrastructure solutions for 100 facilities globally – including data centers, servers, networks, and storage. Lead a team of six. Manage a \$1M budget. Provide vision and drive change to move IT forward. Research new technologies and lead proof-of-concept evaluations. Report directly to CIO.

- **New Data Center:** Selected and led the \$5M build of a new, modernized greenfield data center with mission-critical recovery and redundancy for clients who require 100% uptime. Project is now considered one of the most successful in the company's history. *See results in graph.* →
- **Pioneered Logicom's first cloud solution** utilizing AWS to support China business. Developed business case and championed concept to leadership. Drove automation for cloud deployment and management.
- **Reduced backup-related service desk issues by 99%** by introducing a hyperconverged cloud backup system. Sold concept to C-Suite and drove change company-wide.

Data Center Modernization Results

PROFESSIONAL EXPERIENCE, CONTINUED

XPR LOGISTICS | Atlanta, GA

8/2011 – 1/2013

A \$4B, international company that provides storage warehousing and logistics.

Manager, Enterprise Servers & Storage

Managed all enterprise class servers and warehouse management systems to ensure uptime at 250 global locations. Led a geographically dispersed infrastructure team of 12. Accountable for technical architecture, strategic planning, vendor negotiations, and a budget of \$1.8M. Provided high-level technical advice to senior management.

- Stabilized an outdated legacy infrastructure, reducing outage incident calls by 80%.
- Led the research, design, and purchase of a new greenfield \$2.5M state-of-the-art, stable infrastructure based in a Switch data center – consolidating multiple data centers and paving the way for growth.
- Led the highly-visible design and deployment of a comprehensive server and storage infrastructure for an automated warehouse project in Indianapolis – the most critical project in the company.

“He has a true passion for innovation and delivering the best possible business value.”

“Dan is able to relate well at all levels in the organization, from the shop floor to the board room, and is able to take complex technical ideas and communicate them effectively with each audience.”

“He is consistently one of the hardest working IT team members who always delivers results.”

Ben James, CIO, NetCom Inc.

LOGICOM | Auburn Hills, MI

11/2005 – 8/2011

Manager, Enterprise Servers & Storage (Promotion)

Led a team of three providing systems engineering and administration for global UNIX enterprise infrastructure to ensure uptime. Managed technical architecture, planning, vendor negotiations, and a budget of \$500K.

- Unified international teams – formerly from three separate companies – to work cohesively after an acquisition.
- Led global team through a refresh of aging UNIX server and storage infrastructure – improving speed, resiliency, and disaster recovery.
- Designed and deployed server infrastructure to support global rollout of SAP and WMS applications.

“Dan is a true technologist. He excels in evaluating upcoming technologies, seeking to separate hype and focusing on bringing true value to an organization.”

Claude Cedars, CIO, Logicom

EDUCATION & TECHNOLOGY

Bachelor of Science (BS) in Computer Science

University of Michigan | Ann Arbor, MI
