

# DANIEL P. HUNTER

## Technical Transformation Leader

*"A visionary IT executive who sees around the corner to recognize the value of new technologies."*

Arjun Patel, Founder & CEO, AlphaTech, Inc.

248-555-0791   
dphunter@nomail.com

## Technical trailblazer who separates hype from value

*Leading practical, cost-effective IT strategies to propel companies forward*

- ▶ Designed global architecture and infrastructure for a company whose clients require **100% uptime** for critical supply chain operations.
- ▶ Drove transformation and pioneered technologies that delivered measurable results – including a **135% reduction** in telecom costs and a **120% reduction** in Internet costs.
- ▶ Stabilized and updated global infrastructure for a global logistics company – **cutting outages by 80%**.

### Core Strengths

Technical Strategy  
Project Management  
Infrastructure Planning  
Budget Management  
Cloud Infrastructure  
Business Continuity  
Emerging Technology  
IT-Business Alignment  
Global Team Leadership

## TECHNICAL LEADERSHIP EXPERIENCE

**LOGICOM** | Auburn Hills, MI | A global supply chain logistics provider serving high-profile, Fortune 500 clients.

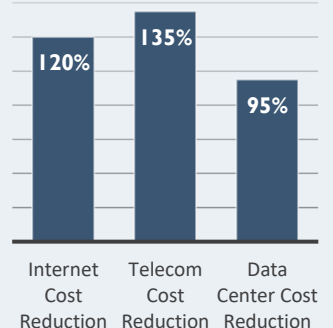

2/2013 – Present

### Global Director of Technology

Design robust, cost-effective infrastructure solutions and oversee IT architecture powering 100 facilities globally. Create vision to drive IT forward. Research new technologies and lead proof-of-concept evaluations. Manage a \$1.2M budget and team of six.

- ▶ **Modernized Data Center:** Piloted the \$5M build of a new data center with mission-critical recovery, redundancy, and 100% uptime. Project is now cited as one of the most successful in company history.
- ▶ **Pioneered Logicom's first cloud solution** utilizing AWS to support China business. Developed business case and championed concept to leadership. Drove automation for cloud deployment.
- ▶ **Slashed backup-related service desk issues 99%** by introducing a hyper-converged cloud backup system. Piloted transformation company wide.

### Data Center Modernization Results

**XPR LOGISTICS** | Atlanta, GA | A \$4B international company that provides storage warehousing and logistics.

8/2011 – 1/2013

**Manager, Enterprise Servers and Storage**

Managed enterprise class servers and warehouse management systems to safeguard uptime at 250 global locations. Supervised a geographically dispersed infrastructure team of 14. Directed technical architecture, strategic planning, vendor negotiations, and a \$1.8M budget. Provided high-level technical advice to leadership.

- ▶ Stabilized outdated legacy infrastructure, reducing outages by 80%.
- ▶ Spearheaded the research, design, and purchase of a new greenfield \$2.5M state-of-the-art, stable infrastructure – consolidating multiple data centers and paving the way for growth.
- ▶ Piloted the high-visibility design and deployment of a comprehensive server and storage infrastructure for an automated warehouse – the most critical project in the company.

*“He has a true passion for innovation and delivering the best possible business value.”*

*Ben James, CIO, XPR Logistics*

**LOGICOM** | Auburn Hills, MI | A \$1.2B supply chain logistics provider with 100 global locations.

11/2004 – 8/2011

**Manager, Enterprise Servers and Storage**

Guided a team of five who provided systems engineering and administration for global enterprise infrastructure to ensure uptime. Managed technical architecture, planning, vendor negotiations, and a \$500K budget.

- ▶ Unified international teams – formerly from three separate companies – to work cohesively after an acquisition.
- ▶ Orchestrated a global team in a refresh of an aging UNIX server and storage infrastructure – improving speed, resiliency, and disaster recovery.
- ▶ Designed and deployed server infrastructure to support global rollout of SAP and WMS applications.

*“Dan excels in evaluating upcoming technologies, separating the hype and focusing on bringing true value to an organization.”*

*Claude Cedars, CIO, Logicom*

**EARLY CAREER**

**Sr. UNIX System Administrator** for Magna Donnelly Corp. – a Tier 1 Automotive Supplier

**EDUCATION**

**MBA** | Michigan State University—Eli Broad School of Management | Lansing, MI  
**Bachelor of Science (BS), Computer Science** | University of Michigan | Ann Arbor, MI

**TECHNICAL SYSTEMS OVERSIGHT**

Platforms	Enterprise Systems	Infrastructure Design
VMware, AWS, Rubrik, NetApp, 3PAR, SAP, UNIX, Linux, Solaris, Citrix, Windows, macOS	Oracle, EDI, ERP	SQL, Progress, Informix

## Explanation of Project

### Header Graphic & Design

After consulting with Daniel and reading his letters of recommendation, a clear theme emerged: Dan was a visionary leader in technical transformation. With that in mind, I researched and curated the ideal visual to tell his story. The lightbulb suggests ideas and innovation, the top of the bulb resembles a globe, and smaller connected lights suggest connectivity. I designed the entire resume around this graphic, using varying shades of blue. To create the illusion that the bulb was casting light down, I ensured that all of the shadows in section headers and boxes were cast downward, and the brighter highlights were at the top.

Under Dan's name, I titled him as a Technical Transformation Leader. One of his most impressive letters of recommendation came from a high-profile thought leader who has built multiple billion-dollar tech companies. Since Arjan Patel (not his real name) is well known in technical circles, I featured his testimonial at the top left of the resume, as part of the header graphic. This endorsement further supports Dan's reputation as a visionary.

### Branding & Summary

There were two aspects to Dan's brand. Yes, he was a technical trailblazer – but one who could evaluate new technology and separate true value from hype. He also ensured that the technology was practical and cost-effective. I created an arrow graphic to convey the benefit he offers, "to propel companies *forward*." I used a gradient to lighten the right side of the arrow to create the illusion that the bulb brightened that area.

### Experience

Rather than the generic "Experience" heading I used "Technical Leadership Experience" to further reinforce his leadership skills.

One of Daniel's largest projects was building a new data center, which produced a number of impressive metrics. I created a graph of these results and matched it to the design of the resume.

As always, I used short paragraphs for Daniel's job responsibilities and bullet points for his accomplishments.

Dan had some additional letters of recommendation that spoke of his unique blend of innovation and practicality. I placed those testimonials next to the appropriate position.

### Outcome

Dan was thrilled with the resume. We used the same graphic for his LinkedIn profile banner for consistent visual branding.
